FULL STACK DEVELOPER

I have been passionate about computers since I was a young boy growing up in Brazil – it started with games, then hardware, and now software development. During my time at Burlington Code Academy, I've discovered that coding and building computers both require technical skills and attention to detail but what I really love about the software side is the ability to solve real-world problems. When I'm not working on my current "passion project" (building a newsletter function for a rock and roll website), I spend my free time as an enthusiastic gamer and avid Jiu-Jitsu Fighter.

SOFTWARE DEVELOPMENT EXPERIENCE

Phantom Theater **Warren, VT** **Nov 2020 – Dec 2020**

Sometimes funky, occasionally shocking, always entertaining, not to be missed!

Developer – Capstone Project, Burlington Code Academy

Member of a team tasked with developing a user friendly, dynamic, community-focused web application to store and present media in a unified layout, easily manage new artist information, automate updates across the site, and maintain the vibe of a rural Vermont theater on a summer evening. Conducted weekly client meetings to review and refine.

- Worked on the website styling by materializing client's aesthetic requests using React, CSS3, and Bootstrap
- Served as version control manager, styled admin dashboard, and created button and full screen "firefly" animations
- Technology used included a FERN Stack (Firebase, Express, React, Node.js), Bootstrap, CSS3, and GitHub
